EDUCATION

California State University East Bay ***Hayward, USA***
Master of Science in Computer Science ***Aug 2025 – Aug 2027***
Coursework: Advanced Algorithms, Web Systems, Adv AI, Operating Systems and Design, Cybersecurity

Vishwakarma Institute of Information Technology ***Pune, India***
Bachelor of Technology in Computer Engineering ***Aug 2017 – May 2021***
Coursework: Data Structures and Algorithm, Operating Systems, Database Management Systems, Cloud Computing

PROFESSIONAL EXPERIENCE

Angular Minds ***Pune, India***
Software Engineer *(Java, Spring Boot, RESTful APIs, Hibernate JPA, MYSQL, ReactJs, Jira, Git)* ***Jan 2023 – Dec 2024***

- Designed and developed scalable backend services using Java and Spring Boot, handling high-concurrency production workloads.
- Built and maintained RESTful APIs with modular architecture and validation, improving system reliability.
- Reduced database query latency by ~30% through indexing and optimization.
- Collaborated in Agile teams across the full SDLC, contributing to design discussions, code reviews, and production support.

Code Gurukul
UI Developer *(React, JavaScript, Bootstrap, HTML, CSS)* ***Jan 2021 – May 2021***

- Developed responsive UI components using React.js and integrated them with backend REST APIs.
- Improved website performance and user experience through optimized frontend design.

PUBLICATIONS

- Co-authored a research paper titled **"Text to Pseudo Code Generation"**, published in **IRJMETS**, Volume 05, Issue 10

PROJECTS

Microservices-Based Backend System (Java, Spring Boot, Docker, REST APIs) (Link) **March 2026**

- Designed and implemented a distributed microservices architecture with separate services for user management and transaction processing.
- Built RESTful APIs with validation, error handling, and modular service design.
- Implemented JWT-based authentication and role-based access control for secure communication.
- Containerized services using Docker to enable scalable deployment and environment consistency.
- Developed unit and integration tests using JUnit to ensure reliability and maintainability.

Distributed Rate Limiter (Node.js, Redis, Express, Docker) **April 2025**

- Designed and implemented a distributed rate limiter using Redis and sliding window algorithm to control API traffic under concurrent load.
- Built Express middleware enforcing per-user and per-IP request limits, protecting backend services from overload.
- Leveraged Redis for shared state across instances, enabling horizontal scalability and consistent rate limiting.
- Improved system reliability under high-throughput conditions by reducing excessive traffic and preventing abuse.

Cloud File Storage System *(AWS S3, Node.js, Express, React, REST APIs) (Link)* **Jan 2026**

- Designed backend services for large file uploads using efficient streaming and AWS S3, optimizing performance for high-volume operations.
- Integrated AWS S3 for scalable object storage and optimized file handling workflows.
- Implemented authentication and access control mechanisms to ensure secure data access.
- Designed efficient API endpoints for large file operations with structured error handling and logging

Real-Time Chat Application *(React, Node.js, Socket.io, MongoDB) (Link)* **Feb 2026**

- Developed backend services using WebSockets (Socket.io) for low-latency real-time messaging.
- Designed a scalable real-time architecture using WebSockets to support concurrent users and low-latency messaging.
- Implemented real-time features and optimized event handling to reduce latency and improve.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, HTML, CSS
- **Frontend:** React, Next.js, Typescript, Tailwind CSS, Bootstrap, Framer, Responsive Web Design, React Hooks, Context API
- **Backend:** Spring Boot, Spring JDBC, Node.js, Express.js, Hibernate/JPA, RESTful APIs, Microservices, JWT Authentication
- **Database:** MySQL, PostgreSQL, MongoDB, Redis
- **Cloud & AI:** AWS (S3), Docker, CI/CD, Vertex, Netlify
- **Tools & Practices:** Git, GitHub, Linux, SDLC, Postman, Figma, Canva

Extra-Curricular

- **AWS Solution Architect Associate Certified** **Jun 2024**
- Post Graduation Diploma in Advanced Computing from CDAC Bangalore **March 2022 – Dec 2022**
